Subject : REACH REGULATION EUROPEAN UNION

To whom it may concern

Dear Sirs,

REACH is a new European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the Registration Evaluation Authorization and Restriction of Chemicals. The new law entered into force on June 1, 2007.

The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. Manufacturers and importers will be required to gather information on the properties of their chemical substances. Which will allow their safe handling and to register the information in central database run by the European Chemicals Agency (ECHA).

Tires and inner tubes are classified as an article, not a substance, leading to that tires are exempt from registration duties to REACH due to article 7 paragraph 1 of REACH.

REACH also contains a list called "substances of very high concern" (SVHC). Any supplier of articles (the category that includes tires) containing SVHC in concentration above 0.1% (w/w) must provide the recipient of the article with sufficient information about these substances to allow registration to REACH. The European Chemicals Agency (ECHA) at present has a list of substances called the "candidate list" 53 in total.

VEE RUBBER CORPORATION LTD. hereby confirms that none of tires and inner tubes under brand name "Vee Rubber" sold in Europe contains any substances that are list on the candidate list of SVHC.

Yours sincerely,

Ms. Panutta Sangwantong
Quality Assurance Manager
